TO: Coaches of Teams Participating in 2019 UC Davis Field Day Food Science and Technology Career Development Event

FROM: Garth Herbert, UC Davis Field Day Coordinator

DATE:

2/4/2019

SUBJECT: Food Science Product Development

We are looking forward to hosting you and your students for the Food Science and Technology State Final at UC Davis on March 2. We wanted to let you know a few things about the contest so you can prepare appropriately. We will not be doing the Math Practicum piece of the competition. The product development team activity will be the final event of the day and there will be down time during the presentations of other teams. The areas of focus for the product development activity have been decided and will focus on a product that meets the following criteria:

- Category: Side Dish
- Platform: Heat and Serve
- Market: Retail

I want to remind all teams to be sure to declare any food allergies. It is important that team members with true food allergies declare the exact allergy through the special needs process. The event committee will make all reasonable efforts to accommodate students with food allergies, however if you have food allergies and cannot participate in the contest, you will lose points. To do this, please fill out the attached form and send it to [caes-field-day@caes.ucdavis.edu](mailto:caes-field-day@caes.ucdavis.edu). We also ask that if you are not planning to bring your team that you let us know as soon as possible.

We wish your teams the best of luck in the competition! If you have any questions or concerns, please feel free to contact me at [caes-field-day@caes.ucdavis.edu](mailto:caes-field-day@caes.ucdavis.edu) or by phone at (530) 754-0322.

Sincerely,

Garth Herbert Field Day Coordinator  
College of Agricultural and Environmental Sciences

All necessary precautions will be taken to ensure the health and safety of participants who have reported food related allergies *prior to February 16*. Each participant must assume the responsibility to take the necessary precautions to protect their health in regards to food related allergies and environmental exposures to the associated allergens.
