## State of the Science Summit Feed Strategies to Reduce Enteric Emissions

May 21-22, 2024

Co-Hosted by the California Department of Food and Agriculture and UC Davis College of Agricultural and Environmental Sciences

### PURPOSE OF THE SUMMIT

Identify and articulate opportunities for collaboration and research that will help the dairy and beef industries – and all of animal agriculture – meet climate goals.

Provide an overview of the need and opportunities for enteric methane emissions reduction strategies to achieve State, National, and Global methane reduction goals.
