Preparing for tests is most effective when done over the course of your term through daily study sessions with varied active learning activities. Then, as you near the test, it can be helpful to make a more intentional test-prep 7-day-countdown plan.

<table>
<thead>
<tr>
<th>DAY</th>
<th>WHAT TO DO:</th>
<th>HOW TO DO IT:</th>
</tr>
</thead>
</table>
| 7   | **GOAL: Evaluate & analyze, plan & organize (see other side to do this):**  
|     | - What do you need to know & what do you know already?  
|     | - How much time do you have & how much time will you spend?  
|     | **GOAL: Create study materials.**  
|     | - Focus 1st on what you don’t know  
|     | - As you make materials, learn as you go & then continue to study with them  
|     | **GOAL: Make links, find differences.**  
|     | - Keep working on what’s challenging  
|     | - Introduce material you feel okay about  
|     | - Make connections & use what you know to learn what you don’t  
|     | **GOAL: Teach the material.**  
|     | - Use the 80/20 rule—spend 80% of your time on new material, and 20% on old  
|     | - Practice saying content aloud—where are your gaps? What to focus on next?  
|     | - Use study partners/groups  
|     | **GOAL: Test yourself.**  
|     | - Wait to look at answers  
|     | - Vary your testing activities  
|     | - Avoid familiarity traps—ask questions on ALL you’ve learned, in no pattern  
|     | - Teach your brain to find pathways back to the information  
|     | **GOAL: Reflect & test more.**  
|     | - Use yesterday’s challenge(s) to decide what to revisit & practice more  
|     | - Remember to test what you know well  
|     | - Explain processes & connections—know the steps to reaching answers  
|     | **GOAL: Bring it all together.**  
|     | - Continue to make connections/identify similarities & differences between all of the content  
|     | - Prioritize sleep & meals  
|     | - Do something relaxing  
|     | **TEST DAY!**  
|     | - Keep to your normal routine  
|     | - Have everything you need  
|     | - Arrive early to choose your seat & get settled  
|     | **HOW TO DO IT:**  
|     | - Look to midterm/test grades—identify what content was challenging  
|     | - Identify material you have & what you need  
|     | - Create a study checklist (topics, formulas, etc.)  
|     | - Create a study schedule for the week  
|     | - Create flashcards & study guide/s  
|     | - Find end-of-chapter questions/problems to answer  
|     | - Visit office hours with questions  
|     | - Write/draw content in your own words—summarize key points  
|     | - Write term definitions in your own words  
|     | - Draw figures from memory  
|     | - Synthesize lecture/reading/lab/recitation notes  
|     | - Teach flashcard terms/definitions  
|     | - Solve problems & explain the steps you took to get there  
|     | - Assign concepts to study group participants & everyone teaches/questions  
|     | - Take practice tests & re-take challenging problems from prior tests  
|     | - Write & exchange test questions with your classmates—what will your instructor want to know you know?  
|     | - Mix old content with new content  
|     | - Visit office hours with any questions  
|     | - Make concept maps connecting different sections/concepts from the term  
|     | - Continue to take & make tests/answer questions from memory; try to replicate your test environment  
|     | - Recite aloud, draw from memory, re-present information in new ways  
|     | - Continue to replicate the test environment—the length of time you get, the room, etc.  
|     | - Keep thinking about what your instructor might ask & be sure you can answer  
|     | - Get good rest, be sure to eat & try to relax  
|     | - Believe in yourself—you’ve got this  
|     | - Take a minute before the test to write what you’re anxious about & then throw it away  
|     | - Deep breaths
